

factsheet **VISCERAL**anatomy²

Task: to localize and segment anatomical structures in medical image data. VISCERAL provides training data and performs benchmarking of algorithms.

Data

15 x whole body CT

15 x whole body MR T1

15 x abdomen/thorax contrast enhanced MR T1

15 x abdomen contrast enhanced CT

Annotations

890 segmented anatomical structures

2420 anatomical landmarks

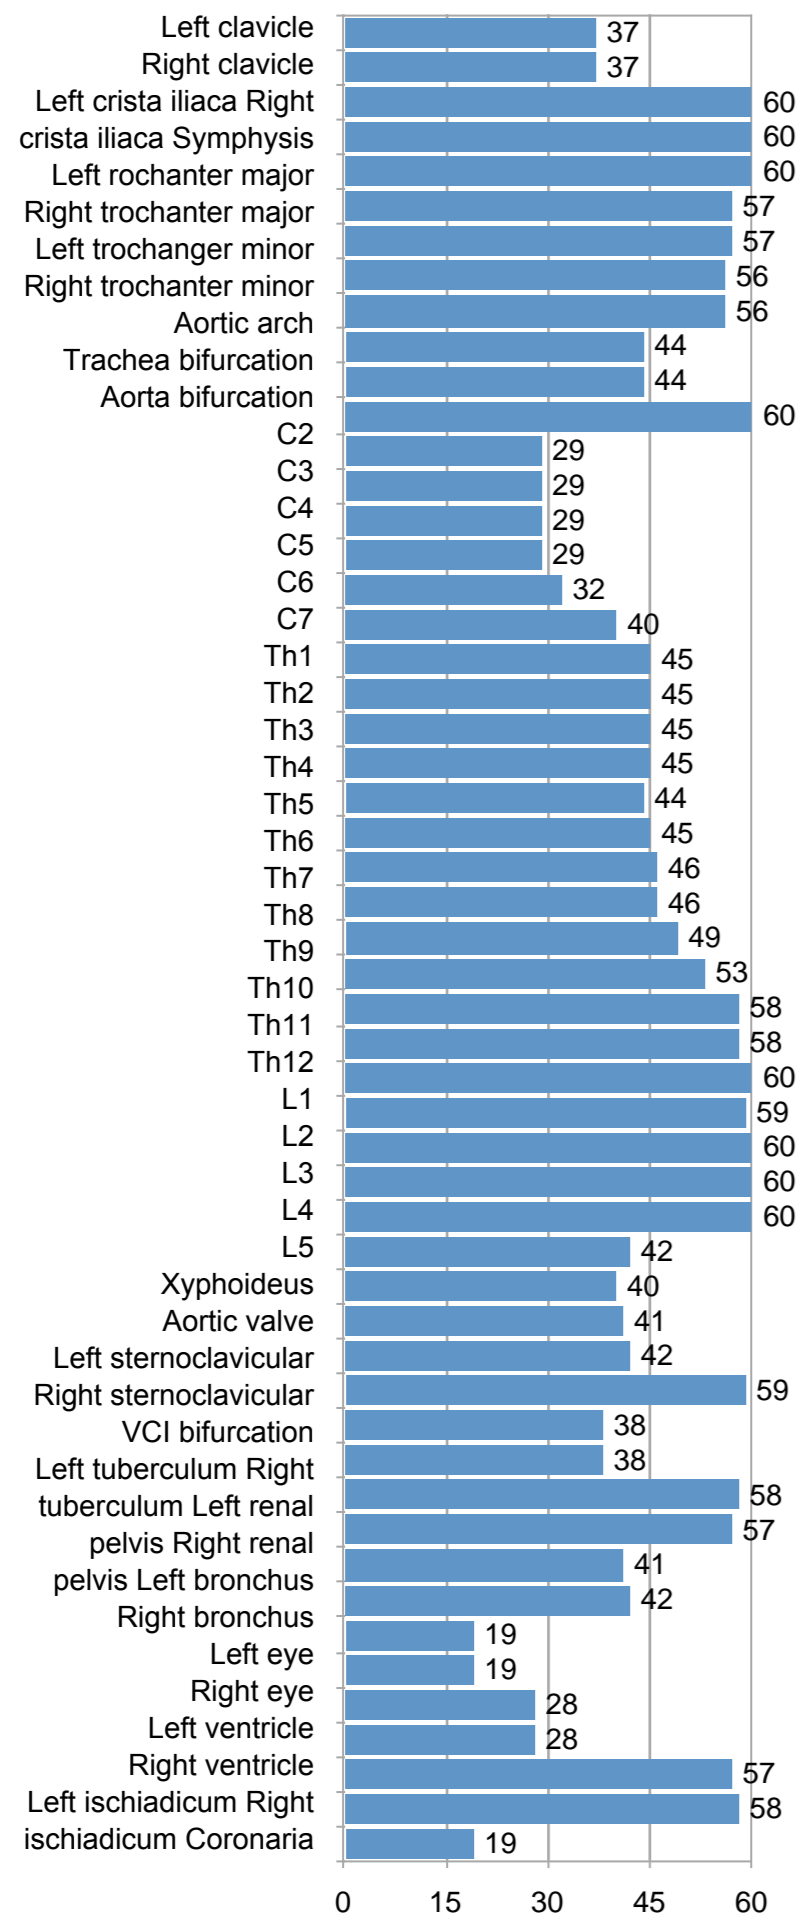

Schedule

Opening: *January 2014*

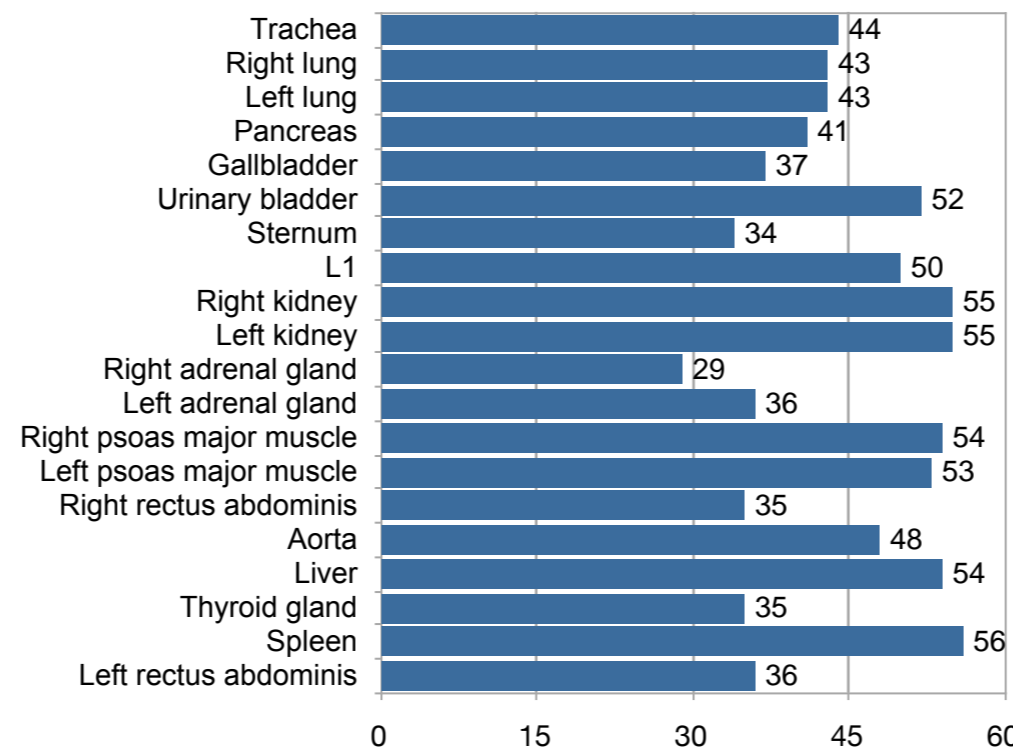

Intermediate evaluation:

during the VISCERAL ISBI Challenge *end of April 2014*

Closing: benchmark virtual machine submission on *June 16th 2014*

Landmarks

Segmentations
